

## Colorado Springs School District 11 Bond Construction Program Monthly “Snap-Shot” June, 2008

Another very busy summer of construction is off to a good start. Major projects include: Open Concept School Modifications (**Fremont, Penrose, Keller, Grant**); Add Air Conditioning (**Mann, Midland, Longfellow, Roosevelt, Emerson**); Science & Art Renovations at **Wasson**; Heating System and Various Renovations at **Galileo**; New Fire Alarm Systems (**Midland, Pike, Stratton**); New Windows (**Hunt, Ivywild, Lincoln, Pike, Stratton, Taylor, Whittier**); and New Auditorium at **Coronado**.

5-9-08—early demolition at Fremont Elementary shows the “openness” of the Open Concept layout.

5-16-08—new stud walls going up at Fremont. Contractors are making the most of our early release schedule—avoiding the need to close the schools for a full semester, as we did during our 1996 Bond Program.

6-4-08 Note the insulation behind the sheetrock in the interior walls—for additional noise control.

6-6-08 Fremont main corridor, with fire-rated windows into the media center. These buildings will be significantly more safe, with fire-rated corridors and classroom walls and doors for “lockdown” emergencies.
