

COLORADO SPRINGS PUBLIC SCHOOLS

EL PASO COUNTY SCHOOL DISTRICT NO.11

ANNA M. RUDY SCHOOL

5370 Cracker Barrel Circle - 328-7600

Mrs. Julie Foster, *Principal*

January 8th, 2008

Are you looking for a way to benefit your business and make a difference in the lives of children at the same time? We are seeking a partnership with you to equip each classroom in our school with current presentation technology used in the business sector, which includes: an LCD projector, document camera, digital camera, and wireless USB tablet. This package will provide seamless interaction of lesson content and materials.

Your one time donation of:

- \$500 will purchase one wireless tablet for a classroom.
- \$1300 will purchase an LCD projector and a document camera.
- \$2,224 will provide a classroom set of equipment, including an LCD projector and a document camera, a wireless tablet, and a digital camera.
- \$_____ Any single piece(s) of equipment using the price list on the enclosed card.

Your business will benefit, not only from the tax deduction, but your positive image and customer base will strengthen as we inform parents and community of your contribution in a variety of ways:

- News of your business sponsorship will be included in the school newsletter and on the marquis
- Press releases will be submitted to local television, newspaper, and radio outlets.
- A poster or banner with your logo will be displayed in the gym
- Of course, any contribution would be greatly appreciated and applied to the purchase of the equipment mentioned above, but we will advertise business partners who purchase at least one grade level set for \$6,900 on t-shirts to be worn by Rudy students.

Rudy students will be required to use 21st century skills throughout their academic careers and in their future employment. Students will be required to be creative, innovative, flexible learners. They will use technology for communication and problem solving. In response to the rapidly changing world, we have developed a Science and Technology focus designed to prepare our students for the 21st century.

More information about our science and technology focus and how we currently use this equipment can be found on the Rudy website at www.d11/rudy.org. We look forward to meeting with you to discuss how we can partner in more detail. Please anticipate a call from us to discuss the partnership possibilities, or call us to schedule an appointment at your convenience at 328-7600.

Sincerely,

Julie Foster, Principal
and the Rudy Technology Team
