

Presenting Your Design

Learning Target:

I can apply my public speaking and / or persuasive writing skills to present my plan.

Materials:

- Paper and Pencil
- Microsoft Word (Google Docs)
- Smart Phone or Digital Video Recording Device
- Finished Design electronic poster, presentation, or Poster Board
- Completed Budget

Activity:

You are now at the most exciting part of this project. You get to present your proposal to your families! You need to be really convincing so they will let you redecorate the room according to your plan in the future. You can do this either by having a family member record your presentation in a video, or by writing a persuasive paragraph. Whichever way you choose, here are some tips to increase your chances of them accepting your proposal:

- Be very enthusiastic when presenting your plan.
- Make sure to include lots of details as to how and why you created the room the way you did.
 - Talk about why you selected the color scheme you used in the design.
 - Explain the significance of the design elements (details in the room, types and colors of furniture, rugs, window coverings, etc.).
 - Share how the theme of your room shows your personality and the things you like.

Getting Credit:

Submit your video or persuasive paragraph on Schoology or via email.
