

Accessing Wonders Resources on an iPad

If you are attempting to open a resource in Reading Wonders, such as a game, and the program does not respond, it is likely because you have pop-ups disabled in your Safari browser settings. Pop-ups will need to be enabled in order to access these resources. This article will walk you through how to modify your Safari settings to allow pop-ups.

1. Launch the **Settings** app on your iPad.
2. Select **Safari** from the settings menu.
3. Under **General**, you should see a **Block Pop-ups** option. Tap the toggle icon on the right so that it appears white instead of green. Green indicates the option is enabled.
