

WebEx Settings to Check If You Have Audio or Video Issues

1. Open your WebEx meeting in your Chrome web browser. Click on the lock icon next to the web address.

2. Make sure it says Allow next to Camera, Microphone, and Sound. If it says Ask or Block, click the dropdown menu and change it to Allow.

3. If you are still having issues, fill out the [Student Technology Support Form](#) and we will schedule a WebEx with you to troubleshoot the problem.
