

## Exploring the PPLD app on your iPad

On every District 11 iPad, there are a couple of apps that are available to use that connect you to the Pikes Peak Library District. There is a Pikes Peak Library District App and a Libby App. In both cases, students can use their PowerPass or put in their personal library card information to log in and access both of these awesome apps.

The PPLD app has access to the eLibrary just as the Libby app does but it also includes optional Research, and Classes and Programs.

Research goes to a screen to Research by Subject, find tutorials, or even learn new languages. Please go through all of these amazing options to see what might be of interest. The eLibrary has lots of options to choose from like eBooks, eAudiobooks, eVideos, and even free music!

TumbleBooks is a young reader site that has Story Books, Read Alongs, Graphic Novels, and even Puzzles and Games. There are so many great places to explore in the Tumble Book Library. This is a great way to hear a story and read along at the same time.
