

Lord of the Flies poster

Breezi McCullar

Why did I choose this topic?

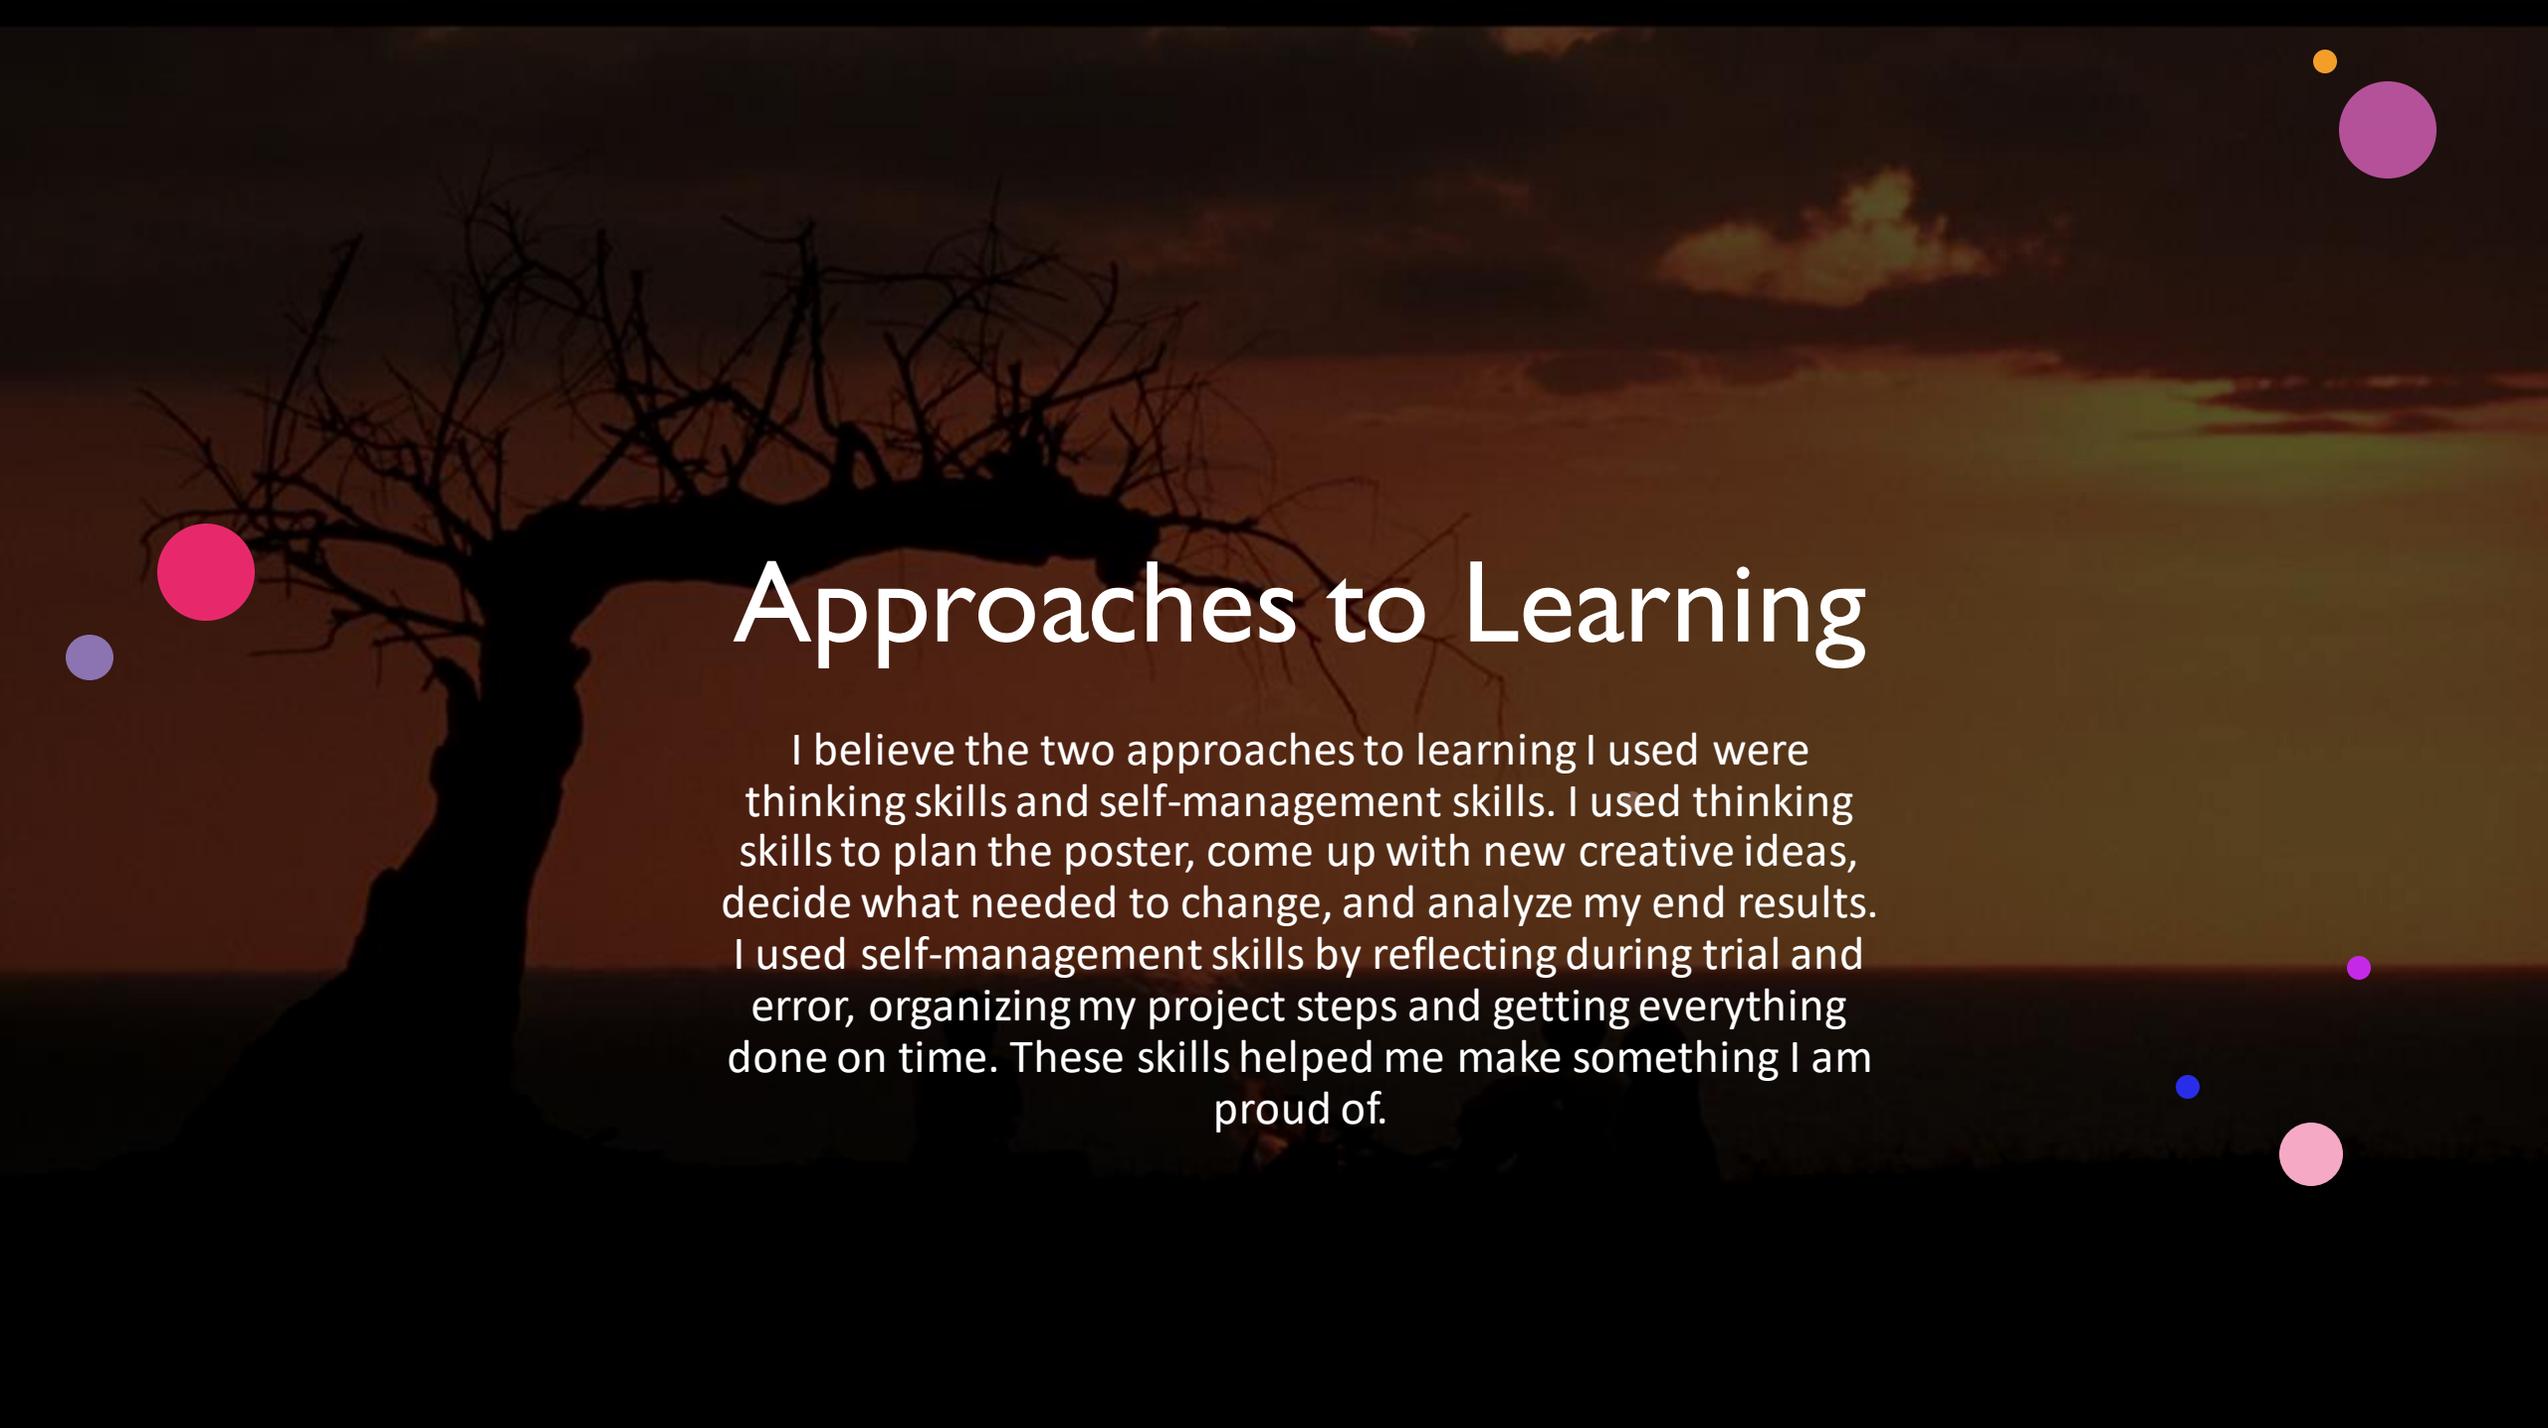

I chose to share my Lord of the Flies movie poster because I am incredibly proud of it. I spent a lot of time creating this. Lord of the Flies has been a favorite in my family for years, so when we were given assignments on the story in our ELA class I was ready to give it my all. I feel like reading the book with my class gave me a better understanding of moral values and different perspectives. I use this project to show all that I have learned.

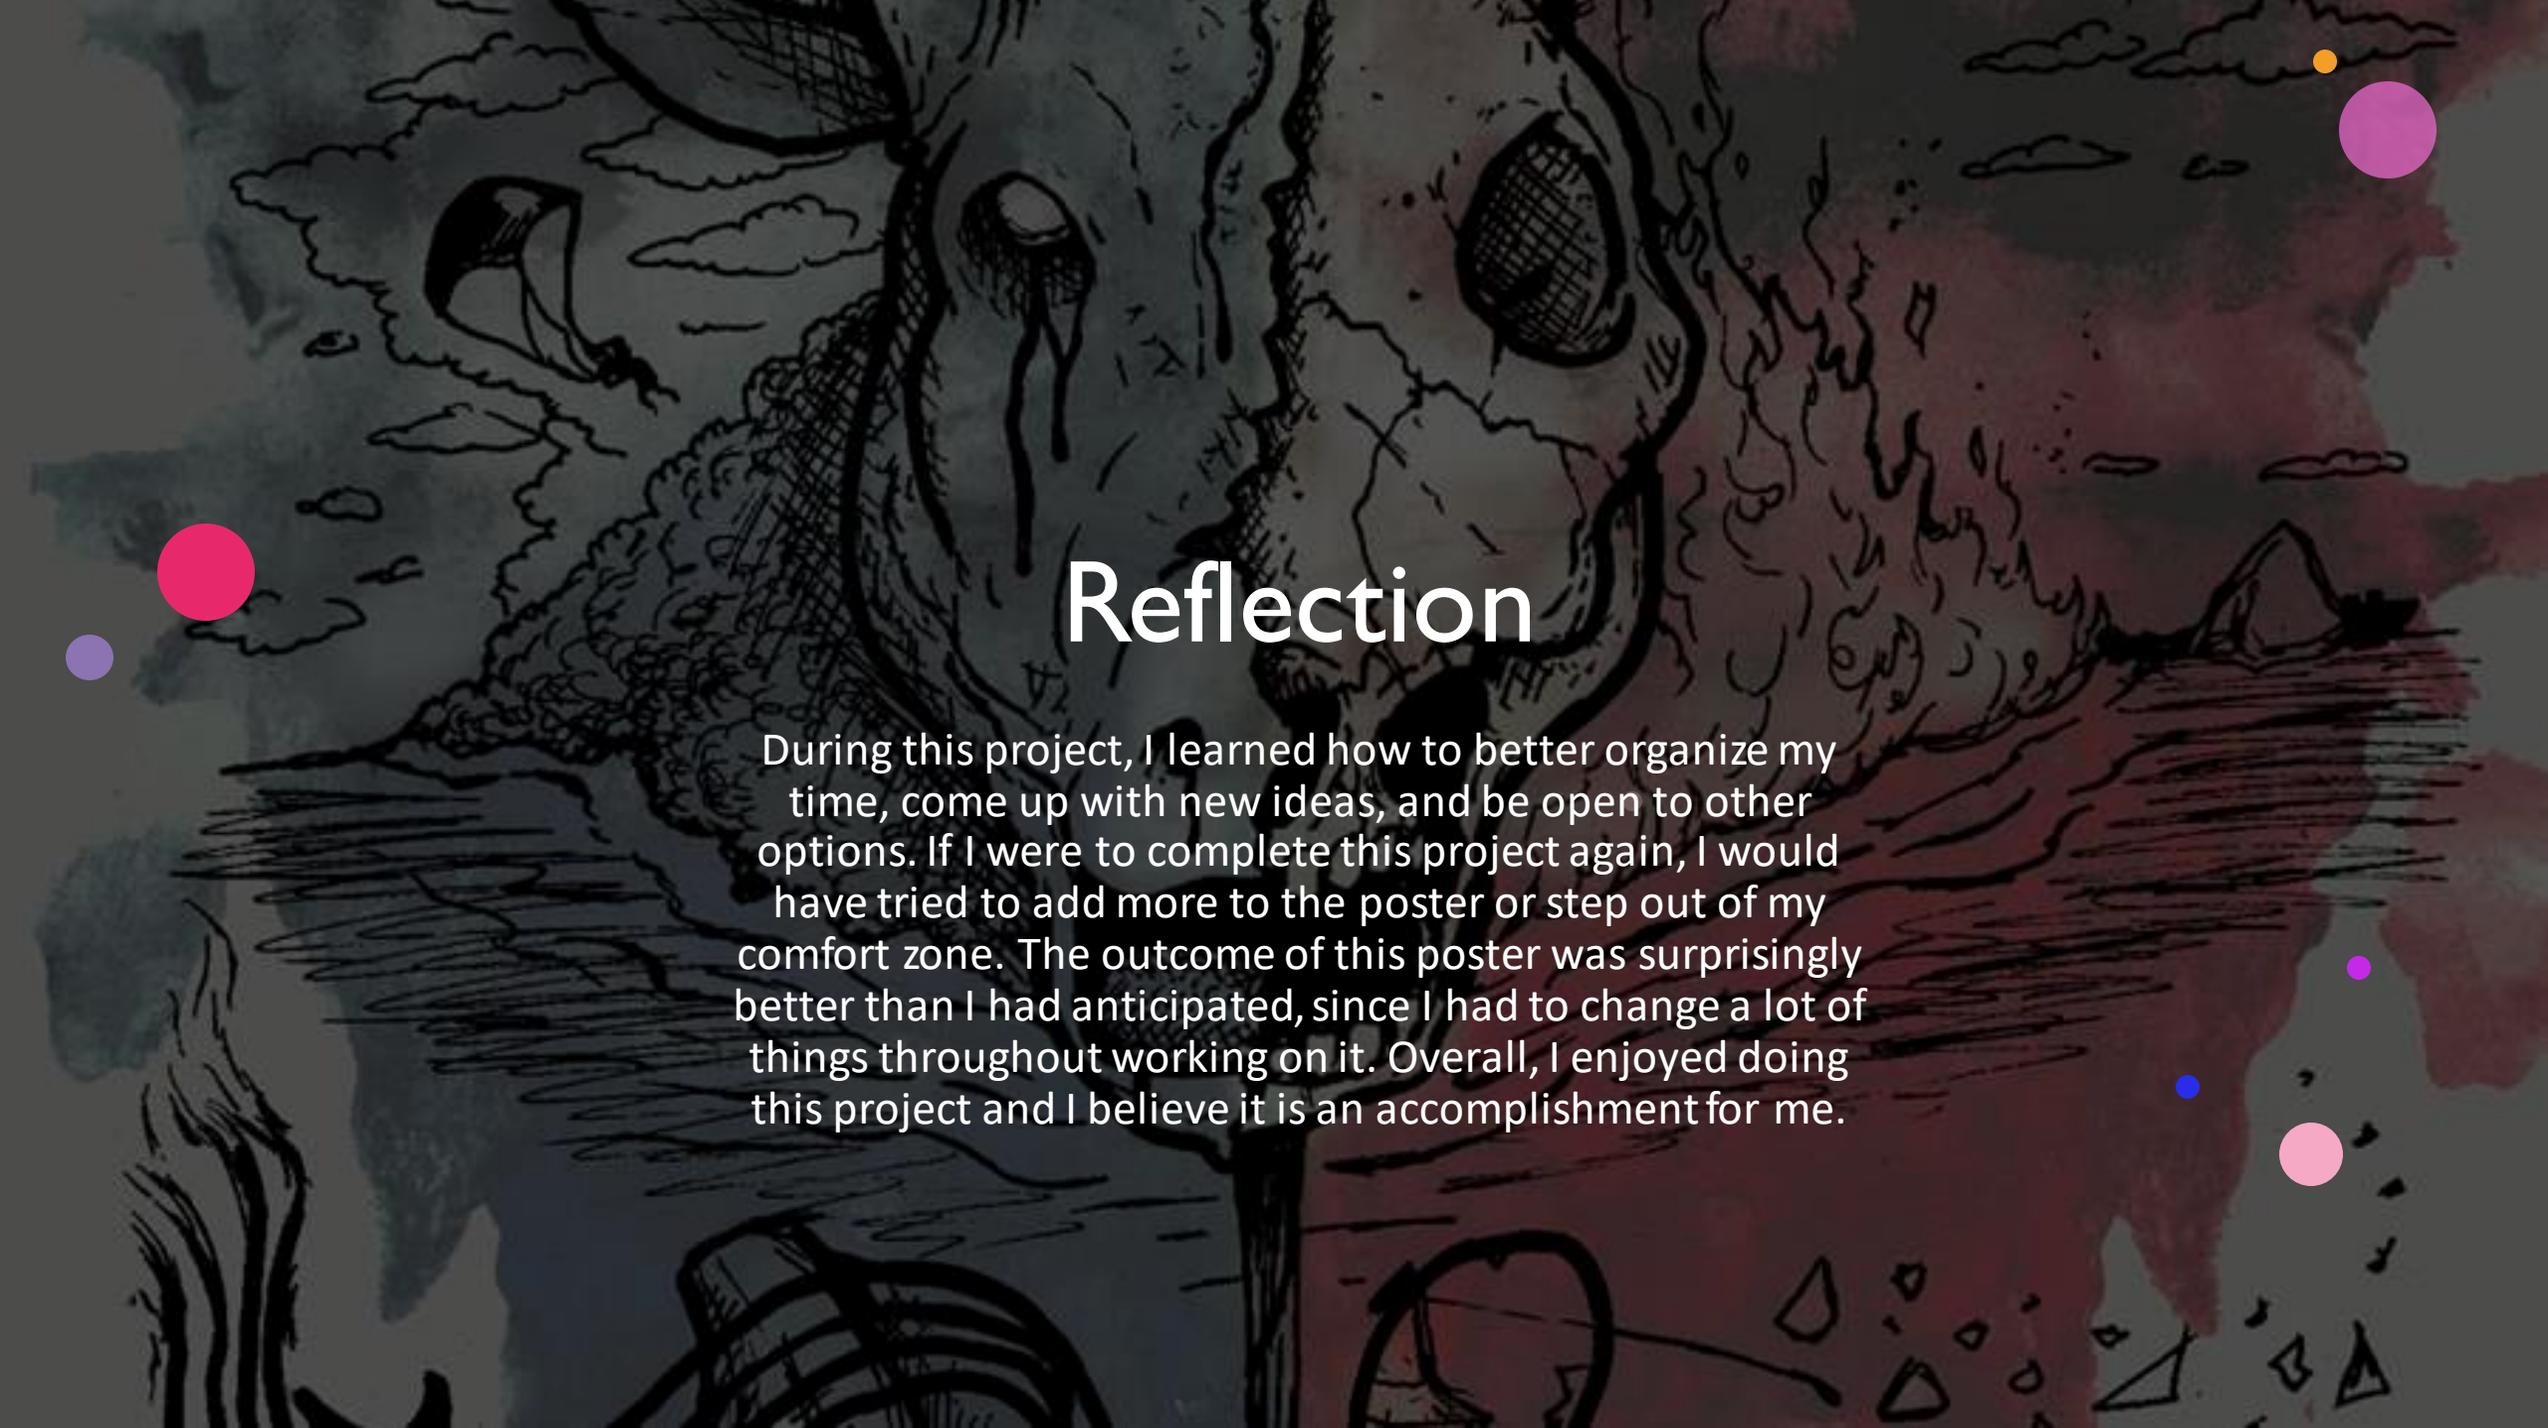

Global Context

The global context I feel best relates to this project would be personal and cultural expression. I chose this context because most of this project was based on creative liberties, trial and error, and expressing ideas to make things work. Personal expression is incredibly important, as it helps build the world and everything we see around us. During my Lord of the Flies assignment I had to take a lot of chances, start over, and try new ideas to get everything to turn out well. Each time I tried something new and creative, my poster got better.

Approaches to Learning

I believe the two approaches to learning I used were thinking skills and self-management skills. I used thinking skills to plan the poster, come up with new creative ideas, decide what needed to change, and analyze my end results. I used self-management skills by reflecting during trial and error, organizing my project steps and getting everything done on time. These skills helped me make something I am proud of.

Reflection

During this project, I learned how to better organize my time, come up with new ideas, and be open to other options. If I were to complete this project again, I would have tried to add more to the poster or step out of my comfort zone. The outcome of this poster was surprisingly better than I had anticipated, since I had to change a lot of things throughout working on it. Overall, I enjoyed doing this project and I believe it is an accomplishment for me.
