

Updating Win10 1909 Using the Software Center (Windows 10)

You can install software (without administrative privileges) for **on-domain (on district Network) Windows machines** using the Software Center. These instructions are the same for staff and student.

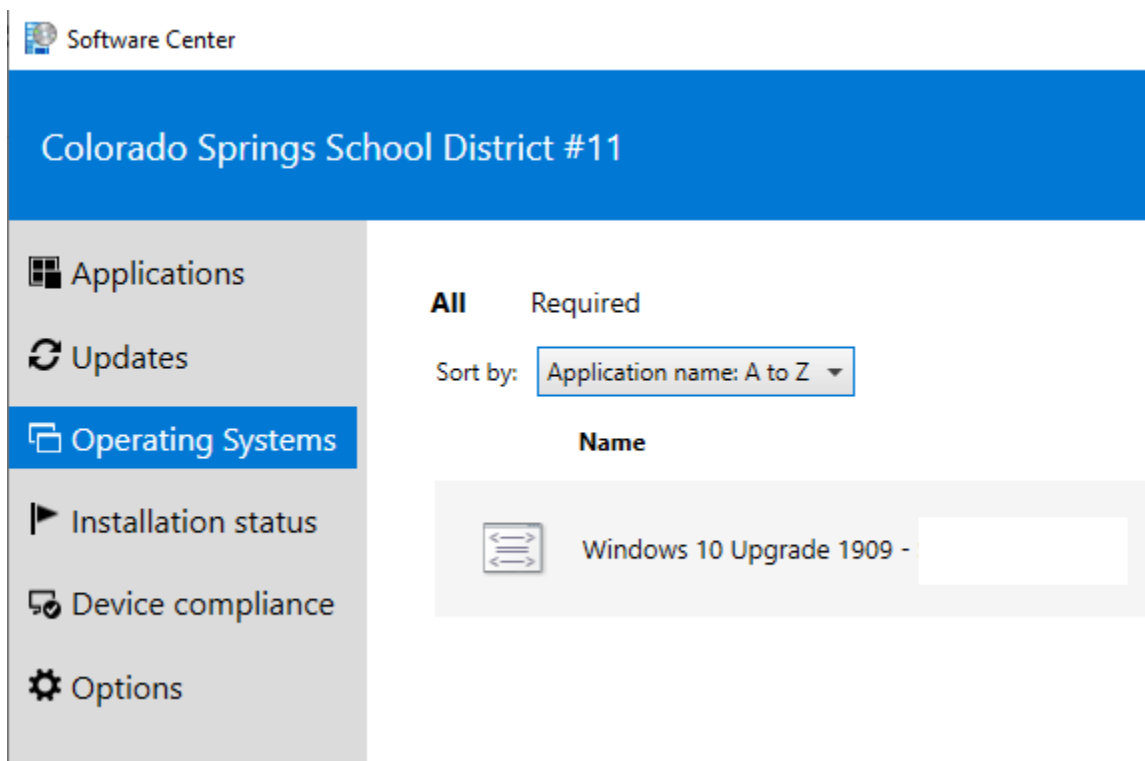

1. Select the **Windows** icon in the lower left corner of your desktop.

2. Enter "software center" to search, then select the **Software Center** application.

4. Select the "Windows 10 Upgrade 1909-Student" in the list of available software under the **Operating Systems** tab.

2. Select **Install**. The program will begin the installation.

The screenshot shows the 'Software Center' interface for 'Colorado Springs School District #11'. The left sidebar contains navigation options: Applications, Updates, Operating Systems (highlighted), Installation status, Device compliance, and Options. The main content area shows the 'Operating Systems > Operating system details' section. A card for 'Windows 10 Upgrade 1909 - Staff New' is displayed, featuring a blue 'Install' button. Below the button, a description states: 'Upgrades OS to 1909 while preserving all software, printers, profiles and setting.' Technical details are listed below: Status: Available, Date published: 11/19/2019, Restart required: Yes, Download size: Less than 1 MB, Estimated time: 0 minutes, and Total components: 2.
