Install Office Apps on Your Personal Device

As a district 11 student, you have 5 Office licenses that you can use to download Office Apps onto your personal devices. **If you need to download** word, excel, PowerPoint, OneDrive, etc. onto a **personal computer**, follow these steps.

- go to office.com and log in using your D11 email and password
- Once you've logged in, select "Install Office"
- from the top right corner, click on "Office 365 Apps"
- follow the onscreen instructions for installation

The screenshot shows the Office 365 web portal interface. At the top, there is a search bar and a navigation menu. Below the navigation menu, there are several application icons: Start new, Outlook, OneDrive, Word, Excel, PowerPoint, OneNote, and SharePoint. A red box highlights the "Install Office" button in the top right corner. A dropdown menu is open, showing "Office 365 apps" (which includes Outlook, OneDrive for Business, Word, Excel, PowerPoint, and more) and "Other install options" (which allows selecting a different language or installing other apps available with the subscription).
