

Problems Using Chrome? Switch to Edge.

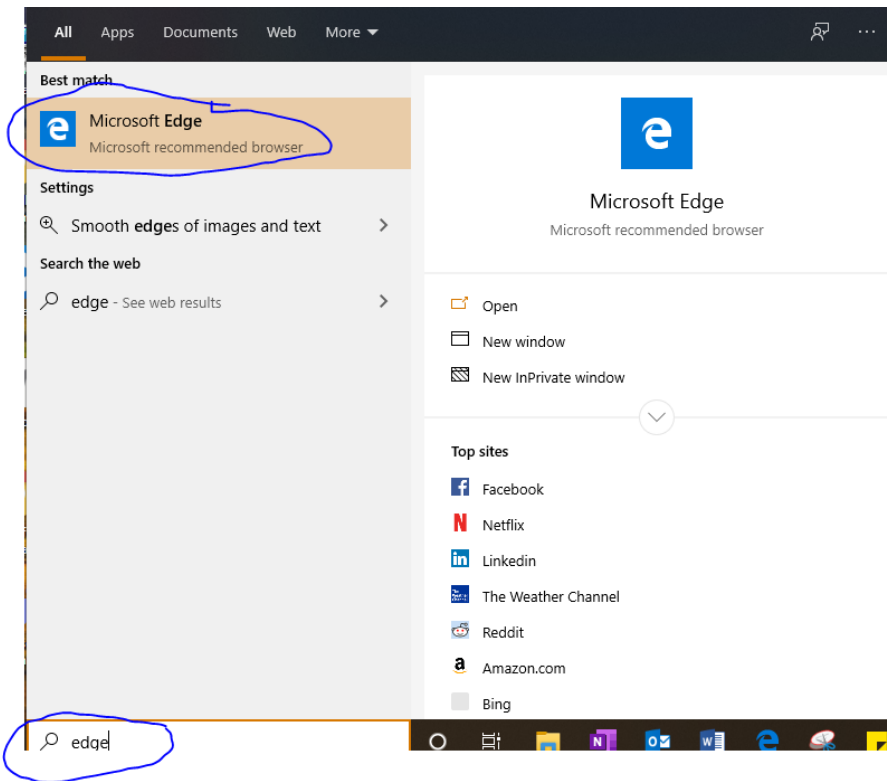

For some reason, a common issue with the new 1:1 device is issues accessing sites using Chrome when at home. The solution for most has been to switch to using the browser Edge.

Here's how:

Find the **Search bar** in the bottom right of your screen.

Type the word **Edge** in the Search bar. You can right click here and "pin to start" or "pin to task bar" for future access.

Once in Edge, you have all kinds of cool features, like using a stylus. Now that you have Edge, try going to Schoology or wherever you were trying to go using Chrome. Hopefully, this solves this issue.
