

D11 Student Laptop FAQs

How do I add the printer from house to my school laptop?

You will not be able to install the printer through settings, those are disabled on student devices. HOWEVER, you may be able to connect your printer via USB cable, drivers should install, and you can print that way. Another option, if your printer is wireless and has a dedicated email address, you can email what you are trying to print to that email address.

How do I install programs I want on my computer?

Installing most programs is blocked by D11. While on the D11 network, you can search for the software center in the search bar on your desktop, and install available programs.

How can I connect my wireless headphones to my laptop?

Because settings are not accessible with a student log in, you cannot connect your wireless headphones.
