

Schoology Issues: Submitting Work from OneDrive

One solution is making sure your OneDrive app is activated. Here's how you do that.

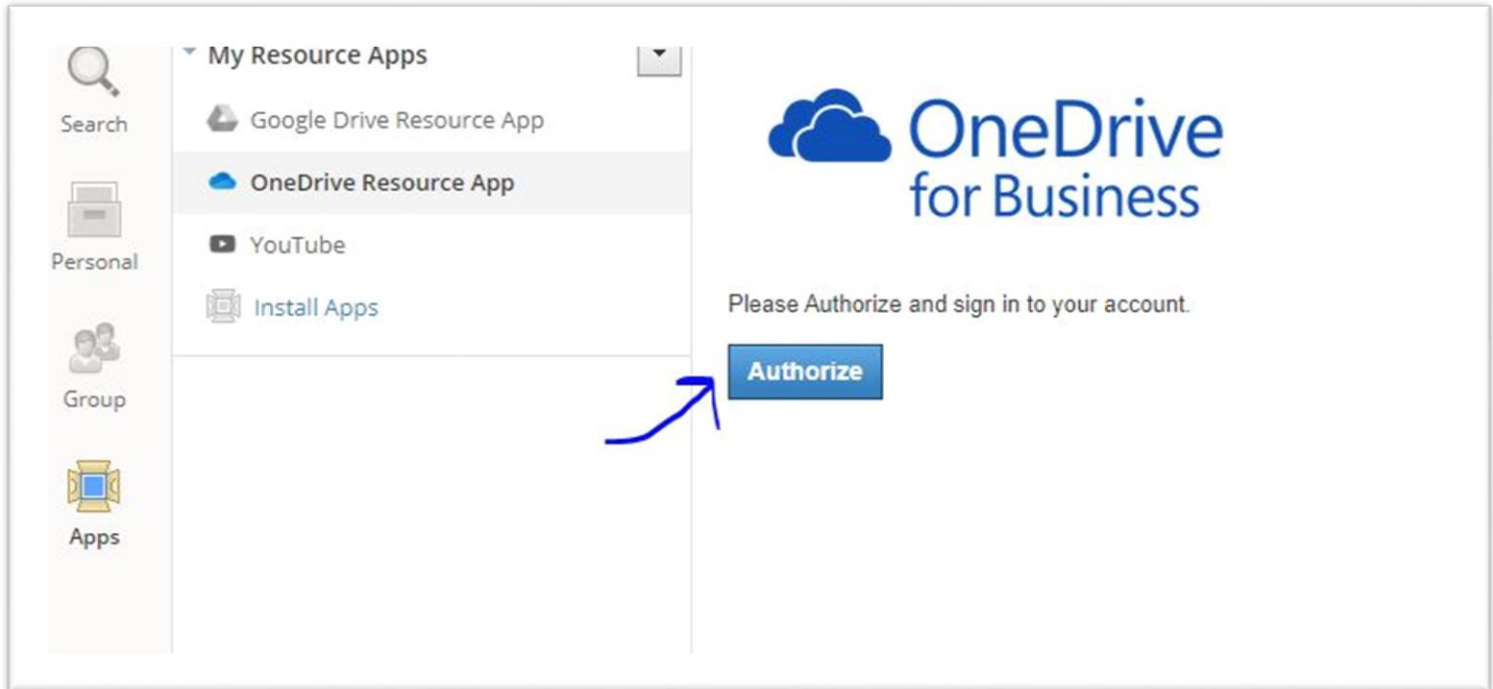

- 1) Log on to **Schoology** and then click on the **Resources Tab**. Then click on the **Apps icon** along the left side.

- 2) Notice after you **click apps** your apps pop up. If your OneDrive Resource App is grey, it is not active and might be creating issues for you.

3. Click on **OneDrive Resource App** and **Install/Authorize**. It will ask you to **log on to OneDrive** (your D11 email as username, your D11 network password as the password).

4. Once you see your OneDrive populated with your files, you are set. Now try going to your class and submitting an assignment.
