

STUDENT CONDUCT ON SCHOOL BUSES

Safety is and shall be the first priority for our Transportation Department. Student conduct on the school bus has a direct impact on safety.

Regular Education transportation services are a privilege that have been extended to eligible students to support District educational objectives and student achievement. Unless otherwise provided by law, violation of a student bus conduct rule by any student shall be sufficient cause for the student to become ineligible for the privilege of transportation on a school bus. The District may impose additional consequences and discipline as deemed appropriate for the infraction.

The school bus driver has the responsibility for the supervision of students from the time they board the school bus until they disembark at an approved destination. The driver shall report to the Director of Transportation or designee, the names of students who violate the Transportation Procedures and Safety Rules (located on the District's Transportation web page), violate the Student Conduct, Discipline, and Attendance Code (located on the District's Board of Education web page), or exhibit any behavior that may constitute a violation of a criminal statute.

The Director of Transportation or designee shall report to the school principal or designee the names of any students who violate the District's Code of Conduct, Discipline, and Attendance or a criminal statute. These students may also be subject to actions pursuant to the District's student discipline policies and regulations, including suspension, expulsion from school and/or civil action.

A student's parent/guardian shall receive notification of a suspension from bus transportation for their student. The District will make its best effort to notify parents/guardians prior to the suspension of services.

The Superintendent shall ensure that regulations are developed to implement the details of this policy.
