

Create an Inventor Project

1. Create a folder in your **U:** drive. Name it for the project.
2. Open Autodesk Inventor
3. In the top ribbon click on **Projects**
4. Click on **New** in the bottom of the pop up box.
5. Make sure **New Single User Project** is selected.
6. Click **Next**
7. Then type in the name of the project
8. Click on the ... at the end of the second line
9. Browse to find the folder you made in your **U: drive**
10. Once you have selected the folder then click **OK**
11. Then click **Finish**
