

## Student Login steps for Seesaw

These steps should only have to be followed once, and then the device should “remember” the student after that. **Note:** If you are logging in on an iPad, please open Safari (NOT the Seesaw app) and follow these steps; after entering the login information the app will open with your student logged in.

Go to seesaw.com, and then “Log In” (upper right-hand corner), and then “I’m a Student”.

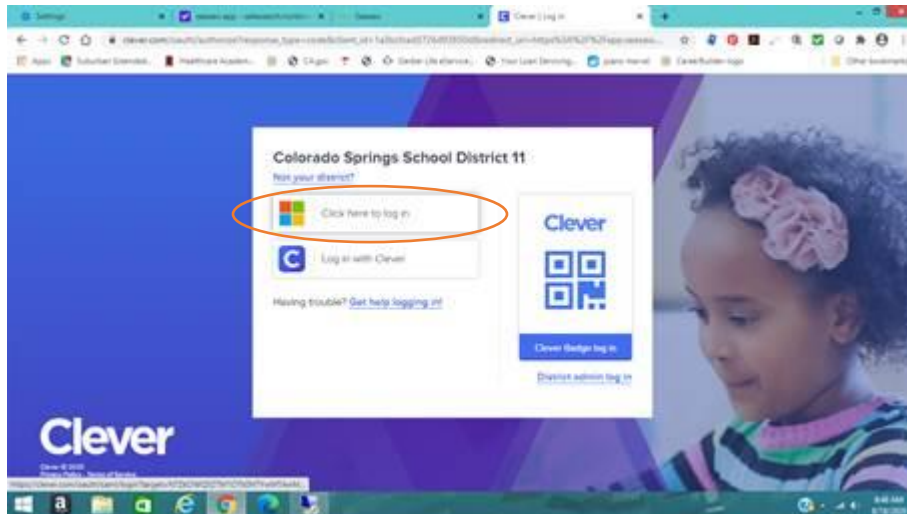

Click Seesaw for Schools Clever Sign In

## Student Login steps for Seesaw

Note: After this step, you *may* have to choose your school from a drop-down menu. We don't know why, but sometimes it asks for it and sometimes it does not.

Select "Click here to login" next to the Microsoft icon.

A login screen will pop up. Type in the Student's long email for username and Network password for password. Click Sign In. They'll use:

Username – [firstname.lastname@d11.org](mailto:firstname.lastname@d11.org)

Password – network password

The students will then be directed to their Seesaw Dashboard.
